Sangre de Grado · Dragon's Blood · Drachenblut

Sol & Selva is a Peru-based B2B supplier of pure Croton Lechleri resin — known internationally as Dragon's Blood and locally as Sangre de Grado — providing 100% pure resin with full export documentation for global cosmetic and industrial brands.

100% Croton Lechleri resin

Sourced in Peru

Documentation on request

Samples for qualified B2B buyers

ABOUT SOL & SELVA

Resin supplied direct from Peru.

The Amazonian Croton Lechleri tree produces a deep red resin known as Sangre de Grado or Dragon's Blood. We source it in the Peruvian Amazon together with Asháninka communities and supply it to cosmetic manufacturers and industrial buyers worldwide.

Wild-harvested

Hand-tapped in the Peruvian Amazon using selective, low-impact techniques that let trees recover and keep producing.

Single origin

Sourced from a defined region in the Peruvian Amazon, with full traceability from tree to container.

Export ready

From samples to bulk volumes, shipped internationally with full export documentation.

THE PRODUCT

Croton Lechleri resin in pure form.

A dark crimson,viscous resin from the bark of the Croton Lechleri tree, used as an ingredient in cosmetic formulations and other industrial applications.

- Astringent and skin-protective
- Rich in proanthocyanidins (SP-303)
- Traditional Amazonian use
- Natural deep crimson pigment

APPLICATIONS

Cosmetic & industrial use.

We supply Dragon's Blood resin to cosmetic manufacturers, formulators and industrial buyers. Private Label service is available on demand.

- Cosmetics & Skincare — Anti-aging serums, balms, masks and skin-protective formulations.
- Wellness & Spa — Spa and natural-care product lines.
- Research — Reference material for laboratories studying proanthocyanidins and SP-303.
- Natural Pigments — Inks, dyes and artisanal applications using its deep crimson hue.

SOURCING & SUSTAINABILITY

Harvested with care.

Resin is hand-collected through small, controlled bark incisions that allow the tree to recover and continue producing. We work with Asháninka harvesters in the Peruvian Amazon under long-term agreements.

- Selective, low-impact harvesting techniques Long-term partnerships with Asháninka harvesters
- Filtered and prepared for export in Peru

Documentation & Samples on Request

Quality control from raw resin receipt to final jerrycan filling. Independent batch analysis from a DIN EN ISO/IEC 17025 accredited German laboratory available on request. Export documentation and shipping coordination, including Certificate of Origin and SERFOR documentation.
